#### VENETA CUCINE

Veneta Cucine embraced the concept of "more space, more freedom" with new kitchen system 'Edge'. The kitchen evolves from the centrepiece of a well-defined space to form the fulcrum around which daily living revolves. The back opens onto the living area, expanding the definition of space.

#### SMEG

Part cooler, part car, Smeg and Fiat merged form and function to create an extraordinary new item for the 'FIAT 500 Design' collection (below). Smeg also presented 'ARIA' (right), an innovative and compact air purifier, designed to be installed inside any type of hood, with technology powered by Vitesy.
